

# HABITAT FOR THE FUTURE

**SPEAKER**

## DR. HEATHER BATEMAN

**Professor  
Arizona State University  
College of Integrative  
Sciences and Arts**

**Dr. Heather Bateman is a Full Professor at Arizona State University. As a wildlife ecologist, Dr. Bateman's research interests lie in exploring herpetofauna and avian responses to habitat alteration, with a particular focus on applications for conservation and management. Additional research avenues include exploring urban ecology and the social-ecological factors predicting human-wildlife interactions. Dr. Bateman teaches herpetology and ornithology courses at ASU where students conduct research projects and participate on field trips. Dr. Bateman mentors undergraduate and Master's graduate students in applied wildlife conservation and has been recognized for mentoring by professional societies including the Arizona Chapter of the Wildlife Society, recipient the ASU Outstanding Master's Mentor Award in 2022, and recipient of the 2022 Charlie Painter Memorial Award by SWPARC (Southwest Partners in Amphibian and Reptile Conservation). Dr. Bateman has authored 60 articles of which 40% are led by student mentees.**
